SLANT NOSE TECHNOLOGY

The Slant Nose technology optimizes ski/snow contact by acting on the tip.
 Tip volume is reduced by 15%: less inertia, lighter.
 A livelier, more responsive ski, with easier edge control.
The center of gravity is shifted in 2 directions:
 > CLOSER TO THE INTERNAL EDGE
 For more direct weight/power transfer.
 Supremely efficient advanced grip.
 > CLOSER TO THE SNOW
 For excellent ski/snow contact, precision and tolerance.

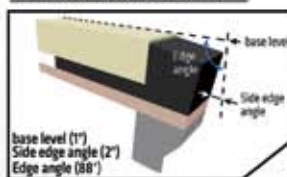

CASCADE TECHNOLOGY

The new Cascade Tip uses varying shapes of metal and fiberglass laminates at staggered lengths to provide a lighter extremity. The unique layered shapes control tip torsion which smoothes out turn initiation and improves full edge contact. The lighter weight tip improves the swing weight of the ski for quick and adaptable turn initiation.

SHELL DESIGN

CONTROL FIT TECHNOLOGY

The process of shell engineering with the foot scanning system, allows for a more accurate and precise fit of Lange boots.

ADVANTAGES

Anatomically contoured heel cap provides better retention, and perfect ski control.

Accurate in-step height, moderate upper flaps forward lean allow to comfortably fit a wider range of in-steps and guarantees the perfect wrap.

Tapered mid-foot transition holds the navicular and cuboid without applying too much pressure or being too loose, and delivers control for narrow and wide feet.

Asymmetrical toe box provides the proper volume to comfortably fit the toes without compromising control and feeling. It also allows for better thermo insulation.

- Perfect wrapping all around the foot for a very wide range of feet;
- Modular in-step wrap which guarantees the correct position and retention of the foot;
- Great heel cap deFINISH and retention;
- Generous toe box volume without compromising the control and the performance;
- More anatomical feeling compared to other ski boots.

- A** 4° Ramp Angle - 10 mm gap heel vx forefoot MP 26,5
- B** 12° Forward Lean (without rear spoiler)
- C** 0° Canted shell S ole (canting is given only by cuff)
- D** 1,5° External upper cuff lean
