SLANT NOSE TECHNOLOGY

The Slant Nose technology optimizes ski/snow contact by acting on the tip. Tip volume is reduced by 15%: less inertia, lighter. A livelier, more responsive ski, with easier edge control.

The center of gravity is shifted in 2 directions:
 > CLOSER TO THE INTERNAL EDGE
 For more direct weight/power transfer.
 Supremely efficient advanced grip.

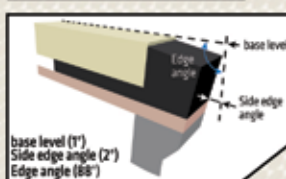

> CLOSER TO THE SNOW
 For excellent ski/snow contact, precision and tolerance.

CASCADE TECHNOLOGY

The new Cascade Tip uses varying shapes of metal and fiberglass laminates at staggered lengths to provide a lighter extremity. The unique layered shapes control tip torsion which smoothes out turn initiation and improves full edge contact. The lighter weight tip improves the swing weight of the ski for quick and adaptable turn initiation.

SIDE EDGES ANGLES
