PROP TECH

Transversal ski flex release system.

In response to the new turn radius regulations issued by the FIS, we have worked hard on the actual structure of the ski in a bid to improve turn initiation and make handling more enjoyable. The result is the Prop Tech Technology. The Zical top reinforcement layer is cut lengthwise at the tip of the ski for superior power transfer and ski control.

This technology is used by all our World Cup racers.

POWER TURN ROCKER

This ski has high traditional camber for 90% of its length, delivering power as well as excellent snowfeel and grip on the piste. A slight rocker over the remaining 10%, at the tip, makes turn initiation easier and more controllable.

10% / 90%
LOW ROCKER HIGH CAMBER

CASCADE TIP

This specific tip construction involves stepping the end-points of the top two layers, one metal and the other fiberglass. The objective is to reduce tip inertia and weight, giving a ski that is livelier and more receptive.

This construction also delivers better torsional control of the tip, for more effective grip and very high precision in turns.

ROSSIGNOL RACE DEPARTMENT RECOMMANDATIONS (SKIS, BINDINGS, BOOTS)

General Observations: Ski selection, both model and length, will always be a very personal and, to a large degree, a very subjective decision. The following chart shows some of the common trends we noticed as a result of our ongoing testing, which should be taken into consideration when making model and length decision. Optimal ski length is determined by the following order: ability, weight and strength. The Rossignol Race Department hopes you will find this information useful and wishes you an excellent winter of racing. Good luck at the races!

HELMETS & ARMOR

Szanowny Kliencie,

POC

W 2005 r. firma POC wchodząc na rynek zdecydowała się zwrócić w stronę społeczności zgromadzonej wokół wyścigów narciarskich. To wymagająca grupa klientów żądająca od sprzętu najwięcej. Podczas tegorocznych ISPO szczególną uwagę widzów zwróciły nasze nowe pomysły i innowacyjne rozwiązania, mające na celu ograniczenie siły uderzenia wpływającej na ciało i mózg.

W tym sezonie z dumą możemy zaprezentować Ci kask Skull Orbic Comp. Mamy nadzieję, że poświęcisz kilka minut i zapoznasz się ze zdobywcą już dwóch nagród, kaskiem zaprojektowanym zgodnie z nowymi normami FIS i innowacyjnym sposobem ochrony głowy.

Obserwowaliśmy narciarzy alpejskich za pomocą kamer wychytujących szybkie ruchy, i zauważyliśmy, że niektórzy z nich wykorzystywali kaski, aby odginać bramki. Znajdowali najkrótszą i jednocześnie najszybszą drogę do celu. Z kolei gdy badaliśmy kaski wykorzystywane przez narciarzy Pucharu Świata zauważyliśmy zużycie z przodu spowodowane powtarzającym się uderzaniem w bramki.

Skontaktowaliśmy się z Richardem M. Greenwaldem, amerykańskim inżynierem biomedycznym z piętnastoletnim doświadczeniem dotyczącym badań i rozwoju biomechaniki sportowej i ortopedycznej. Z pomocą jego systemu prędkościomierzy zamontowanych wewnątrz kasków zmierzaliśmy dosłownie wszystkie parametry wielu biegów GS naszych narciarzy.

Testy wykazały, że przeciążenia sięgające 70g wraz z powtarzającymi się wielokrotnie podczas jednego biegu uderzenia w kask są równe siłą zderzeniu (z pełną szybkością) kasków dwóch graczy

w futbol amerykański. Zaskakujące wyniki testów doprowadziły nas do konkluzji, że aby zapewnić bezpieczeństwo narciarzom, musimy na nowo wymyślić kaski wyścigowe.

Dlatego zawiązaliśmy współpracę z uniwersytetem Mid w Szwecji i Narodowym Szwedzkim Centrum Badań nad Sportami Zimowymi. Zaowocowało to dostosowanymi do naszych potrzeb testami laboratoryjnymi, w których sprawdzamy sprawność różnorodnych kombinacji materiałów, osłon i wyściótek - według powtarzalnych scenariuszy i schematów.

Skull Orbic Comp jest zatem wynikiem szeroko zakrojonych testów, współpracy z wiodącymi centrami badań nad sportem i doświadczenia firmy POC w zakresie tworzenia bardzo zaawansowanych kasków wyścigowych. To dzięki innowacyjnym materiałom i rozwiązaniom technicznym mogliśmy stworzyć kask spełniający wymagania jazdy w trudniejszych warunkach: z większą prędkością, siłą gwałtowniejszych uderzeń i powtarzalnymi wstrząsami wynikającymi ze zderzeń z bramkami.

Skull Orbic Comp posiada panel deflektorowy (który zgłosiliśmy do opatentowania), z EPP wytrzymałym na wielokrotne uderzenia i unikalnym elementem VPD 2.0, który pozwala na odpychanie bramek ograniczając wstrząsy i siłę działającą na głowę. Panel deflektorowy chroni także wyściótkę kasku, która zapewnia jego integralność i ochronę wtedy, gdy naprawdę jej potrzebujesz, czyli przy prawdziwym zderzeniu lub upadku. Panel spełnia nowe, ostrzejsze wymagania FIS: zmniejsza energię powstałą w wyniku zderzenia z bramką o nawet 50% więcej niż inne kaski wyścigowe. Kask Skull Orbic Comp stanowi kolejny kamień milowy na naszej drodze ku pełnemu bezpieczeństwu narciarzy wyścigowych. Cieszymy się, że możemy się z Tobą nim podzielić.
